

STARFLOWER™
Essentials

ORGANIC SKIN CARE

The *Living* Skincare Company™

Welcome to **Starflower Essentials**. We are one of the very few **leading holistic skin care manufacturers in the United States, offering a complete spa line of certified organic/bio-dynamically grown, food grade ingredients and certified organic/wild crafted, uncut, and undiluted essential oils and synergies**. Starflower uses **no chemicals, propyls or parabens** in any of our skin nutrient products and we **package in glass rather than in plastics**, to prevent the degradation and oxidization of our vital ingredients.

Starflower focuses its expertise in blending the highest quality essential fatty acid oils which have a small molecular size to better absorb and nourish the skin. Evening primrose, rose hip seed, borage, hemp and black currant are very costly and used in great quantity to transform the skin to a glowing, smooth vitality.

Starflower Essentials is available to **spas and wellness centers in the US and Canada**. **Starflower Essentials** is *not* available through conventional retail or health food stores. We are not interested in being the biggest skin care company - only in delivering the most vital skin nutrition available. **We assure premium quality** to our clients, not mass-market saturation. Our ingredients are rare, many of which are grown in pristine environments using **biodynamic methods developed by Rudolf Steiner in Germany**. **Starflower is proud to be an active member of the Biodynamic Association in America** and is **dedicated to supporting local BD farmers in the USA**. When available, **Starflower wildcrafts herbs** from the North Woods on Lake Superior. Our exclusive formulas are processed in **small batches to preserve potency and vitality**.

At **Starflower**, our focus is on **synergy**. Our uncompromising, holistic philosophy is what makes us unique in this industry. We have created an entire line of formulas that work together, synergistically, providing a result that is far greater than any of its individual parts. Often we hear of a featured single “wonder” ingredient in a skin care product. Each of our ingredients, separately, could be considered a “wonder” ingredient, and marketed as the core of a product line.

We look forward to partnering with you and your professional staff to introduce and successfully educate the many potential Starflower enthusiasts in your area to the unique experience we can create together.

In health and pleasure,

Cheryl Van Kirk
