Starflower Spa and Wellness Collection

Starflower Essentials Organic Skincare is one of the few leading holistic skin care manufacturers in the United States, offering a complete organic skincare line of certified organically grown, food grade ingredients and certified organic, uncut, and undiluted essential oils and synergies. We take pride in the fact that we use no chemicals, propyls or parabens in any of our Face, Body and Bath skincare products. We package in glass rather than plastics to prevent the degradation and oxidization of our vital ingredients. At Starflower, our focus is on vitality and synergy. Our uncompromising holistic philosophy is what makes us unique in this industry. We have created an entire line of natural formulas that work together, synergistically, providing a result that is greater than any of its individual parts. Often we hear of a feature's single "wonder" ingredient, and marketed as a skincare product. Each of our ingredients, separately, could be considered a "wonder" ingredient, and marketed as the core of a product line. Starflower blends these vital ingredients together to produce a far more potent and long-lasting result for the skin than any one ingredient could accomplish on its own. Also, Starflower keeps the micro-nutrients and trace minerals intact by not standardizing our herbs and using cosmetic grade oils. Starflower Essentials Organic Skin Care ingredients are rare and made from organically or biodynamically grown, wild-crafted herbs and cold pressed oils from pristine environments. As an artisan line, our exclusive, handmade formulas are processed in small batches to preserve potency and vitality. This philosophy embraces the process as being just as important as the end result.

For Spas

- ❖ Professional size for treatments
- ❖ Product Education and training
- ❖ Esthetician training
- ❖ Treatment protocols

For Wellness Centers

- ❖ Product Education and training
